ADJUSTABLE SIDE SHIELD

3-YEAR LIMITED WARRANTY*

STRONG AS THE EARTH IT'S TURNING OVER

A tiller has to dish out a beating without taking one in return. So as it's turning over dirt to clear the way for your garden, you can be sure the Cub Cadet line of tillers will always deliver. They make even the toughest job enjoyable.

Superior Ground Breaking

With 13-inch dual-direction, self-sharpening tines (on select models), Cub Cadet tillers provide exceptional cultivating and seedbed preparation in any soil.

Covers More Ground

Cub Cadet offers a full range of tiller widths from 6 inches to 12 inches for a small flower bed and 18 inches for a full garden. You'll be able to get the job done as fast as you need, no matter the job size.

Easy to Use

Single-hand operation (on select models) lets you stand to the side and steer the tiller with one hand so you don't have to walk in your freshly tilled soil. And an adjustable vertical handle is a simple way to set the height.

WHICH TILLER IS RIGHT FOR YOU? BREAKING DOWN THE TYPES OF TILLERS.

Different-sized gardens call for different kinds of tillers. That's why Cub Cadet offers a full line of tillers to suit your needs. Whether you're just starting to garden or you've been doing it for years, you'll be able to cultivate rich soil so your plants can thrive.

Front-Tine Tillers

- Ideal for smaller garden spaces due to their compact size and maneuverability. Front-mounted, forward-rotating tines dig in for traction and pull the tiller forward as the tines claw through soil.
- A convenient power-reverse feature on select models makes it easy to back up the unit when the end of a row is reached.

Rear-Tine Tillers

- Ideal for establishing new gardens and working existing beds.
- Tines are mounted behind the drive wheels for better traction, faster and deeper digging, and precise overall balance.
- Rear-tine tillers with counter-rotating tines are designed to power through new ground, including even the toughest, hard-packed soil.
- Rear-tine tillers with dual-direction tines power through new ground as well as maintain existing beds.

Forward-Rotating Tines

Perfect for preparing existing flower beds in the spring, maintaining gardens throughout the growing season and composting at season's end. (Front-tine tiller)

Counter-Rotating Tines

Designed specifically for the tough task of breaking new ground, counter-rotating tines cut faster and deeper than forward-rotating tines. (Rear-tine tiller)

Dual-Direction Tines

Provides both forward and counter-rotating tines for all-season versatility. (Rear-tine tiller)
